

ACL Airshop – Animal Flight Services *Class Horse Transport*

Animal Flight Services

Animal Flight Services is the specialist in Live animal transport. With 15 years of experience we know exactly what the most secure and best transport for your live animals is.

Live animal transport

We have a lot of experience with transport of all types of cattle like cows, pigs and sheep. These live animals will be transported in wooden containers or the appropriate penning systems.

Horse transport

Animal Flight Services is specialized in Horse transport. Your horse will fly in the most modern horse container available at this moment. The horse container has been developed together with the finest horse riders in the world. Your horse will be accompanied by professional grooms. This way your horse will always arrive in perfect shape on destination.

Loading

The loading of the horses happens under professional circumstances. The horses will be brought by a forwarding company or private person to our premises. We will accompany the groom during the loading. The gender and size of the horse will be considered to see which place is best for each horse. As soon as the horses are loaded in the container they will receive hay and water. The horse container will be weight and put on a dolly. Finally an employee of Animal Flight Services will bring the horse to the airplane.

Grooms/Attendant

Each horse transport is accompanied by a professional groom. The groom will assist in loading, accompany the horse during the flight and assist in offloading the horse on destination. All our grooms are professionals, they have years of experience and broad knowledge about the health of your live animal. All our grooms studied a

course in the health and safety of live animals at a registered veterinarian. They will know exactly what to do in case of an accident or sudden illness.

Leasing

At Animal Flight Services all Equipment can be purchased or leased. You can always request a quotation. The Horse container which we sell is manufactured by our own factory in Germany. The horse container has been developed by our grooms, customers, affiliated companies and agents. We can say that our horse container is the safest and most modern horse container for air transport of horses, at this moment. Exact specifications can be found at our website www.afsonline.nl
