## ACL Airshop - Introduction

### Your global one-stop shop for ULDs and cargo control equipment

Being a leader in the aviation industry, ACL Airshop provides you with the most complete ULD and cargo control products and services package. We take great pride in offering you the highest quality products backed by the best service possible. It is our goal to solve all your ULD issues with one phone call.

### Manufacturing, sales, lease and repair

We manufacture, sell, lease and repair ULDs, nets, straps and pallets. There are many companies that can provide you with one or two of these services, but we are the only one that does it all. With ACL Airshop you have access to 40,000 ULDs at 185 locations worldwide, 24 hours a day. If so desired, we can also arrange all logistics for you.

In everything we do, we adhere to these golden principles:

### Quality – service - pride

With more than 19 years experience in the industry, ACL Airshop offers the world's largest inventory of new and used ULD containers, pallets and related air cargo equipment available for short or long term lease anywhere worldwide. International, domestic, and charter airlines along with freight forwarders, airport handlers and distributors make up our clientele.

Our ability to provide these services has made ACL Airshop a leader in the aviation industry. Along with the prodigious growth of the airline industry, our company has grown steadily to become the largest ULD leasing company in the world. ACL Airshop is FAA and ESEA certified.

### Offices on three continents

With a lease fleet of more than 15,000 ULDs, we still take great pride in providing all of our customers with the best service possible. With offices located in the United States, Europe and Africa, we are able to provide you with equipment and services worldwide.

### Any kind of lease from \$1 per day

Customized leases are available, from a trip lease to multiple year leases. Why burden your company with the costs associated with owning your own equipment? Depending upon the size of the unit, you can lease ULDs for as little as 1 dollar per day. We aim to make leasing so affordable, cost effective and simple that you can not afford not to lease!

### We are your global one-stop-shop!
