

## ULD Lease

ULD requirements vary by season. Considering that your ULD fleet will sit unutilized for the rest of the time, why not lease ULD's based on actual need?

## ULD Lease – “It makes plane sense”

ACL Airshop offers ULD leases for every situation and need, starting with a minimum of seven days against fixed rates. Naturally, the longer you lease, the lower the rates.

We have storage facilities for our ULD's at Amsterdam-Schiphol Airport (The Netherlands), Brussels Airport (Belgium), Liège Airport (Belgium), Frankfurt Airport (Germany) and Miami Airport (USA). You can pick up and return the ULD's at all of these offices (subject to overstock). All offices also accommodate storage for our other airline related materials like straps, studs, corner ropes, connectors and nets.

## Flexibility with short term lease

Our Short Term Lease Programme gives you the flexibility to obtain ULD equipment where you need it and when you need it. Owning a large fleet of ULD's won't do you any good if they are not where you need them. Why reposition equipment, often at high cost, when you can lease the equipment locally for a fraction of the repositioning cost?

In a case like that, our short term lease equipment might just be what you need. You can lease pallets and containers for as short a period as one week.

## Mid- to long-term lease: a logical step

Rather than tie up a large amount of capital, lease your ULD equipment mid- to long-term. Similar to automobile leasing, ULD leasing offers advantages in capital expenditure and tax deductibility.

ULD equipment. ULD leasing is the logical next step in the evolution of air cargo and as inevitable as the

development of the Internet once was. The sooner you give ACL Airshop's ULD Mid- to Long-Term Leasing Programme a chance to work for you, the sooner you will benefit from improved cash flow, lower repair cost and fewer repositioning worries

## Long term pallet lease includes maintenance

We have developed a long term pallet lease (3 years) with maintenance included. For a very low daily lease rate per ULD you get free maintenance for your leased ULD fleet for the duration of the lease. After 3 years, if you renew the lease, we will completely exchange the leased ULD fleet for new units.

## One-way leases: anything is possible

With our extensive network of offices and correspondents we can offer you a wide range of one-way ULD leasing. Want to lease a 20' pallet in Miami, and need to return it to Amsterdam? We can do that. A horse stall one-way from New York to Brussels? When would you like it? Europe to the US on a one-way lease? Sure, no problem!
